

V-Lite A10

240mm | 360mm

All-In-One Liquid Cooler

Introduction

ABOUT V-LITE

The V-Lite is the 2nd generation of Valkyrie's popular performance-oriented all-in-one CPU liquid cooling system designed for **powerful yet silent operation in any PC**. It ensures **maintenance-free use** and is available in both white and black, with options for 240mm or 360mm sizes.

QUALITY THAT LASTS

V-Lite series is a performance-focused AIO featuring our **patented high-speed pump**, previously reserved for top-tier offerings. Equipped with a copper coldplate and mounting mechanism, it supports the latest AMD and Intel processors. Robust build quality is backed by a **5-year international warranty**.

STRONGER & BETTER FANS

V-Lite series includes new high-speed B12 fans, designed specifically for use on radiators for liquid cooling. **27.3% higher static pressure** and enhanced airflow than their predecessors allow for faster and more efficient heat removal from the PC, offering **superb cooling performance at low noise levels**.

FLUID DYNAMIC BEARING

SHOWSTOPPING AESTHETICS

V-Lite stands out with its **distinctive square pump design**, moving away from the typical round shapes. This form caters to customer desires for a different and unique product. The fresh design, **enhanced by A-RGB LED** lighting in both the pump unit and fan rotors, creates striking and memorable aesthetics.

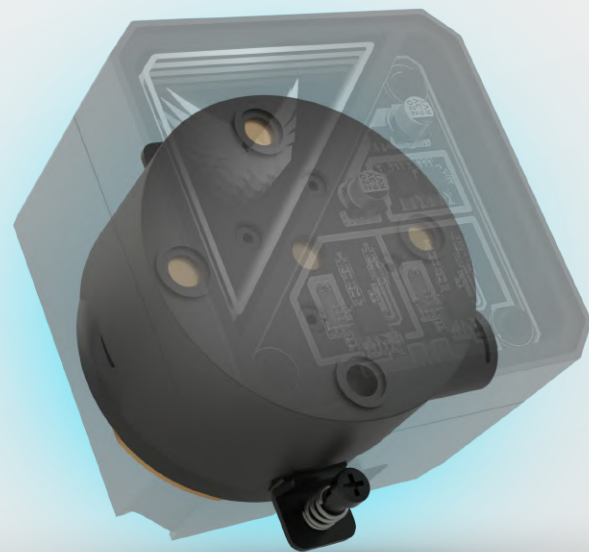

Features

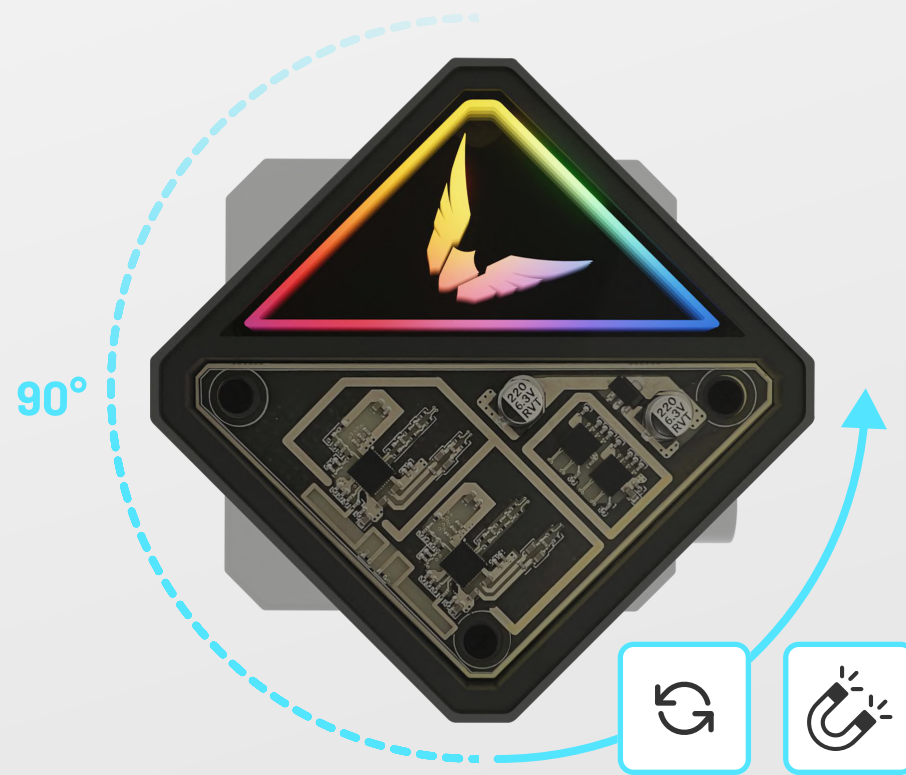

UNMATCHED PERFORMANCE

Pump design, which was used exclusively in the previous AIO generation's top tier offering, is now part of the V-Lite series. Capable of operating at **high speeds up to 2800 RPM for years** without issues, ensures unmatched cooling efficiency. This exact pump design **helped us win several awards** from independent media for best cooling performance among all AIOs they've tested.

UNIQUE MECHA LOOK WITH ROTATABLE PUMP TOP

The Valkyrie V-Lite AIO features printed circuit board that adds a bold "**mecha**" aesthetic for unique style. It has a magnetic cover that **rotates in 90° increments** for always upright installation. This user-friendly design simplifies setup, even for beginners.

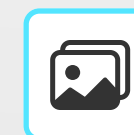

TECHPOWERUP

"... AIO manages to take the top spot when it comes to cooling performance on both our Intel and AMD test benches."
